

Federal Communications Commission
445 12th Street, SW
Washington, D.C. 20554
In the Matter of the Creation of a Low Power FM Service
MM Docket No. 99-25

September 13, 2011

Dear Commissioners:

The 1,675 letters included here in four separate attachments were collected through an e-action website administered by the Media and Democracy Coalition to enable public participation in the low power radio proceeding.

The letters, which are addressed from constituents to their elected officials in Congress as well as to the Federal Communications Commission, ask that channels be reserved for low power community radio in the home districts of their authors.

Sincerely,

Brandy Doyle
Policy Director
Prometheus Radio Project
(a member organization of the Media and Democracy Coalition)
P.O. Box 42158
Philadelphia, PA

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Beth McConnell

Executive Direct Beth McConnell

To my honorable members of Congress and FCC Commissioners,

I was thrilled when Congress passed the bipartisan Local Community Radio Act in December, giving the FCC a mandate to expand low power FM radio and to ensure that there are channels available for new low power stations. This was something my organization, the Chicago Independent Radio Project, had worked hard on. We launched an online station in 2010 with more than 150 volunteers, and we hope we will be able to secure a LPFM license for the station, which already has been warmly embraced by the community.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please join me in asking the FCC to set rules that preserve channels for low power community radio in Chicago.

Sincerely,

Shawn Campbell

President and Founder, CHIRP Radio

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which only repeat the signals of other FM stations. Do not let bigger stations corporate or public bully the smaller ones by taking frequencies that could be used by new low power FM broadcasters.

Please tell the FCC to set rules to maximize the number of new low powered community radio stations. Corporate broadcasters have stations that are far too loud already. Rather than give vacant frequencies to repeater stations that only duplicate existing signals, we need to make sure the maximum number of new community signals are instead given preference. And if the choice is between giving a license to a stronger existing community broadcaster's translator and a new community broadcaster, whenever possible, and particularly on the more crowded urban radio dials, the license should go to the new, weaker-signaled community broadcaster.

Sincerely,

Scott Sanders

Warren, VT 05674

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Armando Olmos
950 N Waterman Ct.

Sharyn Obrigewitsch
3244 G street
Antioch, CA 94509-5901

Honorable Congress person and FCC Commissioners,

I'm writing to you to share my concern about the future of college and community radio in the United States.

I'm pleased that last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

In addition to that, I would love to see more assurance from the FCC that college radio will have a future in the United States. I've been distressed by the pending sale of University of San Francisco station KUSF and hope that we don't lose more college radio stations in California due to the increasing consolidation in the non-commercial side of the dial.

I think it's important to provide opportunities for low power FM as well as make the radio landscape more hospitable for independently-owned stations. I think it's a tragedy that many colleges (including Rice University and possibly Vanderbilt University) are turning their backs on student radio when lured by quick cash from public radio conglomerates. Please don't let that trend continue. Truly educational broadcasters should be rewarded for remaining committed to their students not for selling off their stations to the highest bidder.

Sincerely,
Jennifer Waits

Recently two Pittsburgh area radio owners were granted three translators to re-broadcast their AM signals over the FM band. This is a complete waste of spectrum. These operators were granted AM licenses and if they were not satisfied with that decision then they should not have applied for these AM frequencies. It is amazing to me that ten years ago there was absolutely no space on the FM dial for LPFM in urban areas. All of a sudden there is room for translators, Amazing ! This will destroy any hope of community radio in larger cities. The AM stations , AM 660, 620, and 770 have signals that are far superior to their FM translator counterparts and the translators should not have been granted. Sincerely, Larry Gerson

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for locally-sourced low power community radio in our district/state.

Sincerely,

J.D. Falk
1281 California Drive
Burlingame, CA 94010

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Richard Hynds
12387 Nichols Rd.
Montrose, MI 48457

2718 Belaire Circle
Atlanta, GA 30340-3214

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Katie Fleming

Sunbury, PA 17801

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district and state.

Sincerely,
Keith Hannah

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district and state. This is allowing public space for direct representation, constituent dialogue and a more free nation.

An unregulated "auction" of the public airwaves would be selling the right of communication to the highest bidder, and we have already seen what that produces, in terms of programming consisting of either church sponsored radio (in the entire middle of the US) commercial/bland pop music and little in the way of thoughtful and respectful political debate.

Radio in its inception, was regulated to ensure "fair and balanced" reporting, which has been replaced by "shock reporting," and political diatribe. Radio licensing had an initial obligation was to "educate and inform" the public via background information. While I do not hold much hope of this given the dire lack of funding in the US for any public media, (I am writing from Germany, where 40\$ in monthly taxes specifically earmarked for public radio by anyone owning a radio help support a huge and intelligent journalistic community as well as a vastly more informed populace...) I have some hope that community radio would at least motivate those interested, with noble sentiments in donating their time and intelligence towards public edification, despite this is not being a substitute for journalistic training, it might just be the best we can do at the moment.

Thank you for saving as many licenses for as many LPFM stations as apply. Their existence interferes with no other frequencies, as has been proven.. they can only add to the dialogue..

Sincerely,
Elise Fried

Arlington, TX 76006

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Eric Severson
1316 Market Street
La Crosse, WI 54601

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Susan Sedro

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,
Lawrence Peers

Honorable Congressmen and FCC Commissioners,

It appears that there is only one Radio station that has more than 15% local programming in Oklahoma - The Chickasaw Nation's station in Ada. We now have an opportunity to provide more local (and more relevant) programming through Low Power FM. In Norman alone, there could be room for 5 LPFM stations owned by non-profits.

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profits. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

However, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

Local Community radio with local programming (not piped in or repeated programs) is a vital resource for celebrating culture, sharing information, discussing news and issues and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power Community Radio in our Oklahoma.

Sincerely,

Mary Francis
850-C Cardinal Creek Condos
Norman, OK 73072

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

FRANK MORANO

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

I have a Florida nonprofit that is a potential LPFM applicant. I have attempted, unsuccessfully, to purchase existing broadcast stations, only to find the costs to be beyond our reach, and usually more than the value of the station itself.

With more than 20 years in the radio business, I find it discouraging that I have no hope of ever being able to find a job in radio again. I am legally blind, yet have, in the past, generated both listenership and revenue for my employers.

I live outside of Tallahassee, Florida. The small community in which I live was known as Lafayette.

My parents and brother also own property in Sopchoppy, located in Wakulla County. Wakulla has only one FM licensed to it - yet that same FM is located in Tallahassee. So I would be open to working to bring radio to any of the smaller communities - Chaires, Woodville, Lafayette, etc.

I propose offering programming that would help to fill a couple of format holes, which are not likely to be provided by commercial radio. This includes area traffic, road closures, weather, flooded areas, programming for older adults/seniors, with both secular and Christian programming.

All would be locally originated, from studios I have personally constructed for Internet broadcasting.

I sincerely hope that you will give people like me, true broadcasters, a chance to help our communities by offering quality radio. I'm willing, and able, to provide local programming, and so whatever it takes to make this happen.

Please help.

Sincerely,

Alan McCall

Portland, ME 04101

Honorable Senators, Representative, and FCC Commissioners,

I am writing to support the initiative for low-power community radio. In an era when large media firms are bundling licenses and programming across the country, we are losing the opportunity for local programming.

Last session, Congress passed the bipartisan Local Community Radio Act, which gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

The FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations. On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

As noted, our local communities need access to media to provide programming that reflects the uniqueness of the community. Therefore, the FCC should set rules that will preserve channels for low power community radio in New Hampshire.

Sincerely,

Gary Lerude
125 LILLE ROAD
NASHUA, NH 03062

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

In our case were an existing LPFM that has struggled with channel availability due to encroachment from Entravision corp., combined with paper petitions to the commission to deny a channel change from Clear Channel Corp. A channel change in our case would preserve our LPFM and allow us to better serve the public. The processing of pending translator applications in the commission database will allow us to change channels to a long term viable channel fully spaced so we can continue to operate.

Sincerely,
Frank Magarelli

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

It is critical that you provide the airwaves to NEW low power stations, not simply translators. Our Nation and our communities are founded upon freedom of speech and freedom of the press. Expanding and insuring diversity of speech and press is the only way our Country will continue to generate new and original ideas.

What's more, as the News Corp scandal in Europe dramatically illustrates, we must have a multiple media sources and organizations that provide a check and balance to each other. Granting translator applications simply continues the path of media consolidation in this Country. Media consolidation is not good for our Nation; Media diversification is good for our Nation.

Denying the pending translator applications and saving the airwaves for new low power stations, especially in Miami, is the right thing to do. The American public, not a few selected media companies, own the airwaves. Let the American public have access to what they own.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

William Kennedy
33 Doggett Lane
Nashua, NH 03064

Honorable Congress person and FCC Commissioners,

I support allowing low powered FM radio stations to be awarded to community organizations for the purpose of getting real people's voices heard.

We need community radio in Tacoma that is not filled with content from cities and towns 30 miles away from us (Seattle), corporations with their own narrow interests, or local governmental agencies. We need real people's real stories heard of, by, and for real people.

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. Melbourne, FL 32901

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

I live in Keanae, a very small rural community directly between Paia and Hana. We have taken over the old Keanae Elementary School from the Hawaii DOE and are now a non-profit www.keanaecharterschool.org and want to open a low power radio station in the school to serve an area that has no radio. This could bring together this community, and allow the children to work with it as well. Please help us.

Sincerely,

John Lester

This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

hugh james

los angeles, CA 90039

Honorable Congress person and FCC Commissioners,

I was thrilled to find out that last year, Congress passed the Local Community Radio Act. This bipartisan legislation was the culmination of a 10-year campaign--a coalition of diverse grassroots, faith-based, and non-profit groups. This law gives the FCC a mandate to expand the channels available to Low Power FM stations, which are non-commercial educational radio stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations. On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Granting all of these translator applications is necessarily at odds with the goal of creating a more diverse media landscape. As a citizen and voter in Miami, I believe this is one of the most important issues affecting my community. Our media is dominated by a tiny minority of commercial media groups. As a result, many voices and issues do not get fair representation in our media. An LPFM station that is community-driven would allow these voices to be heard.

Please make sure that urban areas like Miami do NOT grant so many backlogs of translator applications. Stand up for diversity of media. I appreciate your time and effort and look forward to having all of you involved in creating an LPFM station in Miami.

Should you have any questions, please do not hesitate to contact me.

Sincerely,

Leah Weston

This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

David Jones

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Particularly as someone who works with young people to produce their own radio media, community radio is an incredible opportunity for these teenagers to learn about civic education and become empowered citizens in their communities.

Sincerely,
Elena Botkin-Levy
Radio Coordinator, ZUMIX Radio
East Boston

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations. This law gives the FCC a mandate to expand low power FM (LPFM) radio and to ensure that there are channels available for new low power stations.

To preserve these channels as the law requires, the FCC must first resolve a backlog of pending applications for translators, which repeat the signals of other FM stations.

On July 12, the FCC issued a Notice of Proposed Rulemaking, seeking public comment on proposals to balance future opportunities for low power radio and translators.

Community radio is a vital resource for celebrating culture, sharing information, and communicating during emergencies. Please tell the FCC to set rules that preserve channels for low power community radio in our district/state.

Sincerely,

Michael Scurato

Honorable Congress person and FCC Commissioners,

The following paragraphs were indeed prewritten by the website that informs me of this cause and need but I full heartedly agree with every word. Radio is the primary source for community and culture that is currently being dogged and clogged by large, money orientated businesses with only the bottom line in mind. Please support this need and desire for better use of our airwaves!

Honorable Congress person and FCC Commissioners,
I live in the Texas coastal community of Corpus Christi. Six years ago a pass was cut through our barrier island to allow access to the Gulf of Mexico. Boats use the pass on a daily/hourly basis to go into the open Gulf. We need a station here to provide them with information for safety; weather, water hazards, currents.

FOREWORD: I run a small entertainment business centered in OKC. The development of the Bricktown region of OKC has greatly increased my business. In a comparable way, having locally owned radio stations will also increase my business. The large companies who hold a virtual monopoly on the radio waves in the area benefit only larger businesses and help to crowd out local business. Please help smaller local businessmen like myself by allowing more locally owned and broadcast stations.

Honorable Congress person and FCC Commissioners,

Last session, Congress passed the bipartisan Local Community Radio Act, the culmination of a ten year campaign led by a diverse coalition of grassroots organizations, churches, schools, and non-profit organizations.
